The image shows a Visual Studio Code editor window with the following components:

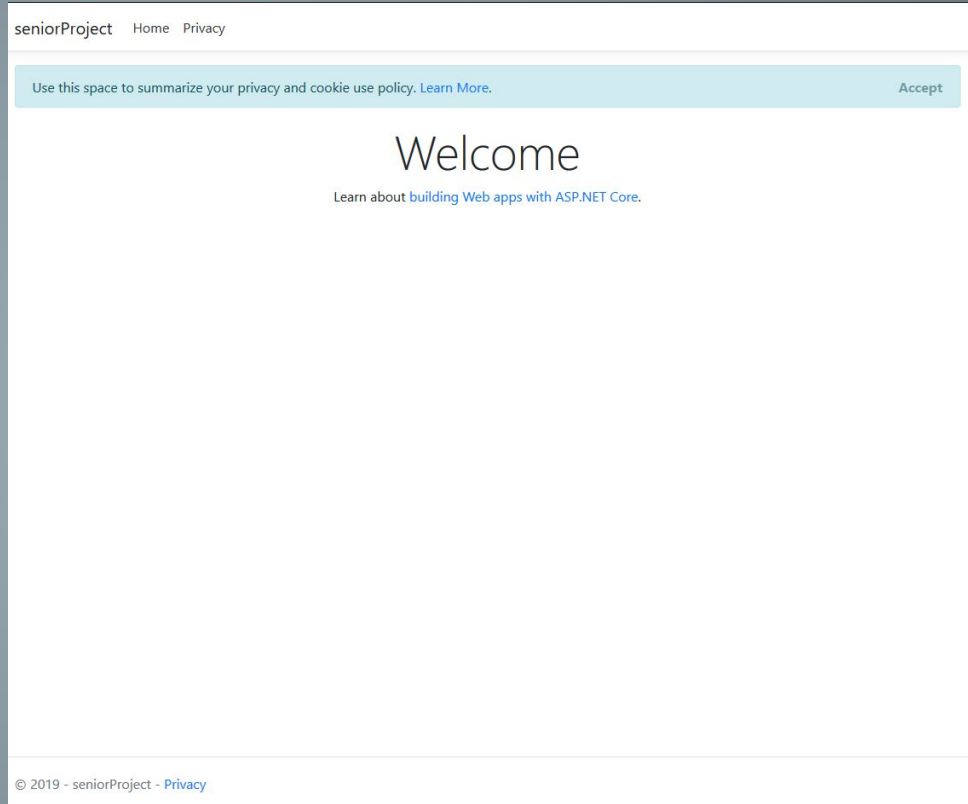

- EXPLORER:** Shows the project structure for 'seniorProject' in WSL: UBUNTU:18.04. The 'Startup.cs' file is selected.
- Code Editor:** Displays the content of 'Startup.cs' with line numbers 11 to 36. The code includes namespace declarations, a class definition for 'Startup', and the 'ConfigureServices' method.
- TERMINAL:** Shows the output of the application running. It includes logs for view execution, action invocation, and endpoint execution. The final log shows a 'System.Net.Sockets.SocketException (22): Invalid argument' error.

```
11 using Microsoft.Extensions.DependencyInjection;
12
13 namespace seniorProject
14 {
15     1 reference
16     public class Startup
17     {
18         0 references
19         public Startup(IConfiguration configuration)
20         {
21             Configuration = configuration;
22         }
23         1 reference
24         public IConfiguration Configuration { get; }
25
26         // This method gets called by the runtime. Use this method to add services to the container.
27         0 references
28         public void ConfigureServices(IServiceCollection services)
29         {
30             services.ConfigureCookiePolicyOptions(options =>
31             {
32                 // This lambda determines whether user consent for non-essential cookies is needed for a given request.
33                 options.CheckConsentNeeded = context => true;
34                 options.MinimumSameSitePolicy = SameSiteMode.None;
35             });
36             services.AddMvc().SetCompatibilityVersion(CompatibilityVersion.Version_2_2);
37         }
38     }
39 }
```

The screenshot shows a GitHub repository page for 'dporter14 / seniorProject'. At the top, there are navigation links for Code, Issues (0), Pull requests (0), Projects (0), Wiki, Security, Insights, and Settings. The repository description is 'Repo for summer camp cabin and activity signup.' Below this, there are statistics: 2 commits, 1 branch, 0 releases, 1 contributor, and MIT license. A progress bar shows the repository's activity. Below the statistics, there are buttons for 'Branch: master', 'New pull request', 'Create new file', 'Upload files', 'Find file', and 'Clone or download'. The main content area displays a file tree with folders like 'Controllers', 'Models', 'Properties', 'Views', 'obj', and 'wwwroot', and files like 'LICENSE', 'Program.cs', 'README.md', 'Startup.cs', 'appsettings.Development.json', 'appsettings.json', and 'seniorProject.csproj'. The 'README.md' file is selected, showing the repository name 'seniorProject' and the description 'Repo for summer camp cabin and activity signup.'

Week of Completion	Project Goal
10/07	Development environments and tech stack training completed; basic page structure in place and viewable.
10/21	Database built and can be edited/accessed by student and admin views.
10/28	Student Cabin Selection works.
11/11	Cabin selection views complete; schedule functionality begins.
12/02	Scheduling working for some number of students.
12/16	Begin work on journal and p2p; finish work on schedule builder.

01/27	Schedule builder completed; should be able to send something via iPad Bluetooth.
03/02	Bluetooth messenger should be able to hop iPads to get to out of range recipients.
04/06	Messaging service completed. Prepare for final presentation.
05/04	Be done entirely and ready to present.

Thank you!
